

# PETITION FOR A RESERVOIR ON THE YELLOW RIVER

This **Petition** is in support of the development of a reservoir, by building a DAM on the Yellow River near Milligan, FL. We the undersigned registered voters in Okaloosa county do express our support for this important project by willingly signing this petition. This Yellow River reservoir is a permanent water solution that can solve the fresh water shortage for all of Okaloosa County, now, and in a hundred years from now. We feel that Okaloosa County Commissioners should do everything within their power to see that this fresh water reservoir is constructed as soon as possible. Our aquifer is getting smaller! Don't wait until it's too late!

As Commissioners, you have the power to make this Reservoir on Yellow River a reality, by supporting this project which will benefit all citizens of Okaloosa county. This is not a north Vs south issue, but rather an issue which effects everyone who lives in Okaloosa County.

There are many other benefits other than water, but none as important as this life giving resource. A permanent solution to the county's water problems is the building of a reservoir and not spending millions for a quick fix solution, every few years. We support the installation of the water pipe lines between north and south Okaloosa County. We do not believe it would become necessary to drill all six wells in the northern part of the county, if you the Commissioners, began working on this project before the end of this 2000-year! Within ten years, the reservoir could be producing water, which could be transported south through the county pipelines.

By placing my signature on this Petition, you will know that I am in support of this reservoir, and I encourage you the Commissioners to support this reservoir on Yellow River, and actively work to see it completed as soon as possible.

**Please print and sign your name as it appears on your voter registration card and include your address. Petition signatures are on the next page...Thank You for helping all of Okaloosa County.**
